WINTER FORMAL kicks-off a new semester

Story and photos by Max Guerrero

Students poured into the Otter Student Union (OSU) Ballroom Friday evening to celebrate the new year and semester at the annual Winter Formal. Hundreds of students attended, ready to show off their outfits, dance, socialize and enjoy refreshments and snacks.

Formal attire was encouraged and Otters showed up dressed to impress. Third-year Gianna Constantine spent her time readying for the dance perfecting a glittery makeup look and coming up with an outfit. Her friend, fourth-year Skylar Paras, prepared with a “long nap” which is reasonable for someone who had gotten out of class just a couple hours earlier.

The Associated Students team pulled out all the stops for the official university event, from a photo booth to a cartoonist drawing portraits. The space was embellished with winter themed decorations such as glittering trees next to the stage and dance floor.

Inside the ballroom, students were given free refreshments. The spread included hot chocolate, vegan and barbecue meatballs, cookies, a veggie tray and chicken satay skewers which ran out soon after the event started.

The local producer DJ Khosmo entertained the crowd on a stage surrounded by flashing lights. He played different songs for everyone, from Despacito to Party in the USA. While she waited in line for the photobooth, third-year Sydney said she had been looking forward to dancing with friends and hoped to hear a song by Taylor Swift. Her wish came true and later that night DJ Khosmo played “Shake It Off.”

The first campus social event of the semester ended at 11 p.m. as students began to walk back to their dorms tired but satisfied after dancing the night away.

2023 Commencement moves to Rodeo Grounds

Story by Ferris Crosby
Photo by Shannon Burns/University Communications

California State University Monterey Bay (CSUMB) will hold its 2023 commencement at the Salinas Sports Complex this spring, the school announced on the event’s website last week. The ceremony has been traditionally held at CSUMB at what is now Cardinale Stadium.

The school is making the move so there can be just one ceremony for the entire graduating class, rather than multiple ceremonies the school has been forced to have in the past.

“We (CSUMB faculty) want all students to be able to celebrate with their friends on the same day in the same place,” said school spokesman Walter Ryce. “The football stadium is not large enough” to do that.

Many students contacted by the Lutrinae and on social media expressed feelings from confusion to disappointment about the move.

A student employee and graduating senior who wished to remain anonymous summarizes some general concerns around the change. “All of us [graduating] at once will make the day so long, and traffic will be a nightmare.”

Cardinale stadium has a capacity of 6,000 whereas the Sports Complex, where the annual California Salinas Rodeo is held, covers 90 acres and has a maximum capacity of 17,000.

CSUMB plans to utilize this increase in space to allow all colleges a same day celebration, not staggering ceremonies on consecutive days based on students’ degree, such as in years past. It will also allow more people to attend. School officials envision a widespread festival type event.

In contrast to CSUMB, some regional colleges such as Sonoma State and the University of California, Santa Cruz will have on campus ceremonies as is standard. CSUMB officials assure that, “The Salinas Sports Complex has hosted graduations for other schools and community colleges in the region so there is a precedent for hosting our commencement at this site.”

But this graduating senior says she’s fine either way. “As long as the effort is made to make us feel special. I want balloons!”

Snow day

Otters are welcomed back to campus with a snow day.

Campus COVID-19 updates for spring

Story by Oscar Daniel Jimenez Iniguez

Photo courtesy of HFCM Communicatie via Wikimedia Commons

California State University, Monterey Bay (CSUMB) has deactivated its emergency operations team on campus as COVID-19 moves into its endemic phase following Governor Newsom's announcement that California would end its COVID-19 state of emergency on Feb. 28, 2023 and record low cases rates and level of test positivity in Monterey County.

In an email sent out on Jan. 17 by CSUMB Campus, Communication informed students and staff that the University would continue to be mask-friendly throughout the semester and update on-campus cases and exposed locations on the COVID-19 Data website.

The University is continuing to offer single self-tests and vaccinations on campus through scheduled appointments with the Campus Health Center.

If you are sick or have any symptoms of COVID-19, CSUMB recommends not attending any classes or work until tested. If tested positive, they are urging those who are to complete a COVID-19 reporting form to help with campus exposure tracing efforts.

Contact and exposure made with someone confirmed to be positive, or someone you believe to be should be reported. The University also recommends getting tested within 3-5 days of the exposure and wearing a mask in all indoor public spaces for up to 10 days, even if no symptoms are exhibited.

For more information, visit.

Academic advisors give advice on returning to campus

Story by Nadia Pulu

Spring semester is relatively busy, with graduation season approaching fast. Some may argue that it is even more active than the fall semester.

This can make it easy to miss out on important information, great opportunities and entertaining events.

Additionally, whether they transferred, it's their first year, or simply their first time in person from previous online learning, there are a lot of new faces on campus this semester and it can be overwhelming to navigate California State University Monterey Bay (CSUMB).

Staying in touch with your academic advisor is an easy and effective way to keep in the loop and find opportunities to meet new people.

Academic advisors Sharon Anderson and Gladys Cabadas, who had many recommendations for students who want to have the most successful semester possible. Here are their main points summarized:

Stay Connected: all students have a designated student email, yet not everyone checks theirs even though so much information is being sent to us almost daily.

Anderson explained

“

Being a student is like a job. If your boss told you to check the information on the bulletin board, you wouldn't just say 'Oh, I don't do bulletin boards.'

”

Your emails are like information bulletin boards at work. You should periodically check them so that you have all the information you need to succeed at your job, which is school.

Get Involved: there are a variety of different clubs and organizations on campus. Specifically, there are 84 student clubs and 24 sports clubs at CSUMB.

Joining a club is a great way to meet new people with whom you'll already have something in common, which is the interest in being a part of the same club.

This is a great way to build relationships and stay involved with what's happening around campus.

Know your resources: sometimes, finding specific resources is difficult because you may not know exactly what you're looking for, but finding the resources your campus offers is an excellent place to start.

You can find this information by visiting the CSUMB dashboard, asking a faculty member like your academic advisor or professor and checking your email for possible resource information.

Ask for help: it's natural to feel some shame or embarrassment when asking for help.

Cabadas encourages students to ask for help stating, "don't be afraid to ask for help. If you're struggling with something, whether it's a class or personal issue, it's important to reach out to someone for help and support."

Anderson reassured, "faculty, staff, we're all here because we care about students and we want to support students" she later added, "your advisors can help you find the resources you need."

Academic advisors are not just here to help students set up their class schedules or keep them on track to graduate.

Beyond that, academic advisors are here to support students with anything they need to help them succeed academically and personally.

They may only sometimes be able to help with specific things, but they will surely point you in the direction of someone who can.

First-time snow on campus

Story by Estrella McDaniel
Photos by Arianna Nalbach

It was an icy kick-off to the new semester, Jan. 24, as almost 100 students joined in for throwing snowballs and sledding at California State University Monterey Bay (CSUMB).

Winter Wonderland at CSUMB was a welcome back week celebration as students returned from break to start the Spring semester. About a ton of snow was piled on the lawn in the middle of the main quad for students to play in.

Dan Burfeind, senior coordinator for student engagement leadership development at CSUMB, explained the event's aim was "to build more of a tradition and commonality between the programs that we do for our welcome back weeks and Otter Days."

And what better way to do it than with snow?

"We're in Marina we don't get snow," Burfeind said, "so it helps combine the two."

Participating students had fun during Snow Day.

"I liked this event. It was really cool and unique," said Akani James, a transfer student. "I've never seen anything like this before and would want to see it return."

This was the first time the school has put on the event and officials hope to make it a tradition.

"Different individuals that work with this program brought a semi-truck full of ice and a big woodchipper,"

Burfeind said. "It took about an hour and a half to get it all prepared, where they then blew it all out into the main quad."

Not only were these organizers prepared with sleds, but they also had snowman molds and shovels, which made things more interactive. Costs were covered by student fees.

"I went to the snow during the break, so it's fun to have another one," said first-year Samantha Snell.

There were also food truck options, which encouraged more individuals to come.

Along with this event, there was also the Winter Ball on Jan. 27 to go along with the theme of the welcome back week, which is hoped to continue as the years go on.

This was to help students have a good time and give people the opportunity to make more connections, organizers said.

"There was music playing and everyone was having a good time, so I walked over and signed my waiver," said fifth-year Riley Romero.

"I grabbed one of the sleds and went down the hill, which was really cool," said Romero. "It was nice to see everyone there having fun, and a great event to get students involved."

Julia Bozzo celebrates Snow Day by throwing some snow up in the air.

A snowball fight breaks out between Nevan Bell and Associated Students President David Ledesma.

Nevan Bell slides through the snow on the Jan. 24 Snow Day.

Otters have access to various helpful food programs

Story by Andrea Valadez

Photo courtesy of former Pennsylvania Governor Tom Wolf via Flickr

With the limited on-campus dining options at California State University Monterey Bay (CSUMB), some students have turned to the state government for aid.

The Electronic Benefits Transfer (EBT) is run through the state of California and the California Department of Social Services (CDSS) and provides people in need with a debit card through which they can receive their "food and cash benefits," says the CDSS website.

"Since I don't make a lot of money, I rely on my EBT money for real groceries, so I don't always have to eat the food from the Dining Commons or the school's student union," said Bethany Reyes, a second-year who benefits from EBT.

To qualify for EBT a few requirements must be met. The Food and Nutrition Service describes these requirements as "including resource and income limits."

"The online application process itself is pretty straightforward, but once you get to the case worker part with the interviews, it gets confusing and frustrating... I would definitely recommend it [to college students] even though it's a little confusing at parts," said third-year Ky McMullen.

McMullen advises that it's best to have all paperwork ready before the phone interview to reduce complications that prolong the process. The interviewer will ask for documents such as pay stubs, proof of enrollment, and proper identification.

Though EBT is a good resource for low-income students, having a meal plan with CSUMB could limit the CalFresh benefits a student can qualify for. In this case, students could utilize on-campus resources to access fresh and nutritious foods.

The Basic Needs Hub is open every week from 9 a.m. to 4 p.m. and offers "nonperishable grocery items, healthy produce, and grab-and-go snacks and prepared food."

The Hub operates on a point system, where students have 5 points per day to grab whatever items they may need at no cost.

Granola bars, coffee pods, spices and other small items are worth 1 point, while more critical items such as frozen or pre-packaged meals can be up to 3 points, according to Basic Needs Care Manager Joanna Snawder-Manzo.

"Another one of my favorite programs is Fresh Access. We created this program a few years ago in partnership with the local farmer's markets, so students can get vouchers for up to \$20 per month to use at farmer's markets in the area," she explained.

If you're interested in Fresh Access, "all students need to do is submit a one-time Basic Needs referral form, and we put them on a list. Then they can come in and pick up their vouchers every month, and they never expire."

Even though these programs can be extremely helpful for students struggling with food insecurity, they are not always taken advantage of due to a stigma surrounding them.

Snawder-Manzo wants to let students know that they're not alone in this situation. "Many students struggle, but that doesn't mean it's OK. It's because of the cost of education and our state being one of the most expensive states to live in. The system is broken, not the students."

"We're here to help. Our focus is to alleviate some of those insecurities, so students can focus on being students," assured Snawder-Manzo.

Students can visit getcalfresh.org to apply or learn more about EBT benefits.

Students test their knowledge at Otter Trivia Night

Story and photos by Maxwelle Tartaglia

California State University Monterey Bay (CSUMB) students gathered in the Otter Express to work in teams to compete to win the very first Trivia Night of the semester on Wednesday, Jan. 26.

With 63 students signed up on MyRaft, they came prepared in groups of three to four to test their musical knowledge and win this Trivia Night's prize, AirPods. The six categories of questions were Female Artists, Throwbacks, Boy Bands, Award Winners, Reality Shows and Billboard Charts.

The energy in the room was tense as groups excitedly debated and wrote down their answers to each question. Between categories, teams switched papers and either groaned or cheered at their results.

The scores were tallied up at the night's end and the team "Sharks" was announced as the winner. Every member of the team walked home with a new pair of AirPods.

Hosted by Associated Students, Mia Lepe and Katie Scott kicked off this first Trivia Night and encouraged students to come to future Trivia Nights that will be hosted throughout the semester.

Trivia Nights will be hosted every other Wednesday at the Otter Express and will have different themes and different prizes! Look out for the next Trivia Night on Feb. 8 – it will be "animal" themed, with animal mugs as the prize.

The distinction between gender expression and gender identity and why it matters

Opinion

Story by Max Guerrero

Illustration courtesy of pikisuperstar via freepik

One of today's most heavily debated topics revolves around the meaning and implications of gender. Gender identity can be controversial because everyone experiences gender differently, which may alter the way they use the term.

The Oxford Dictionary defines gender identity as a person's innate sense of their gender. Our experiences in the world may influence the way we express our gender identity, but the difference between expression and gender itself is one of the flagrant misconceptions when it comes to gender identity.

California State University, Monterey Bay (CSUMB) Assistant Professor of Ethics and Gender Studies Sriya Shrestha said that "Identity can refer to how we feel within ourselves and is internal. I also think that identities can change over time or be malleable."

Shrestha earned a Ph.D. in American Studies and Ethnicity, but has applied her knowledge to gender studies as well.

Gender expression is the way we present ourselves through things like appearance, behavior and language. We can express ourselves in a variety of ways across the gender spectrum without committing to the identity associated with that behavior.

According to Shrestha, "Gender expression refers to something more bodily, like how you dress, carry yourself, talk or walk. [Identity and expression] are related to each other but they are also different."

The concept of gender identity being intrinsic has been displayed in the notable 1960's Nature Vs. Nurture study by psychologist John Money. In his study, an infant male was raised as a girl after being mutilated in a botched circumcision. The subject Joan/John was given hormones and Money hypothesized that being socialized as a female would dictate his gender identity. While the study was being conducted it was considered a great success, but years later John came forward saying that he struggled with his mental health growing up and immediately began to identify as male when his parents told him the truth about his sex.

The discomfort that John experienced is comparable to gender dysphoria — the term associated with transgender individuals which the DSM5 classifies as a marked difference between one's expressed/experienced gender and the gender others would assign them.

Understanding the implications of gender dysphoria is important because it can have a huge impact on someone's quality of life and feel debilitating to those who experience it. A majority of the population identifies with the gender associated with their birth sex, but those with gender dysphoria change their identity and appearance to align with their innate sense of gender.

As more people come out as transgender, our culture is faced with questions such as "Is gender identity a choice?" While we can choose to change the way we

express ourselves, having gender dysphoria is not a choice and those who experience it alter their expression to match their identity.

Some activists claim that gender is a man made concept. This argument is often used to support the right to free expression, but is confusing gender itself with gender roles. While the societal expectations placed upon us based on gender are arbitrary, the American Psychological Association stated that psychologists do not consider sexual orientation to be a conscious choice that can be voluntarily changed. This point is crucial to the gender identity conversation because claiming that gender does not exist suggests that gender identity is a choice.

Students experience the beauty of Monterey Bay on a sunset hike

Story and photos by Oscar Daniel Jimenez Iniguez

Students had the chance to witness a Monterey Bay sunset on a scenic hike organized by California State University Monterey Bay (CSUMB) Recreation on Saturday, Jan. 28.

The hike went from campus to Fort Ord Beach and back. While on the hike, students got a chance to see Monterey Bay's preserved coastal dunes while experiencing the natural environment the trail offered.

When arriving at Fort Ord Beach students were met with crashing waves all along the coast and got to view sanderling birds narrowly avoiding the water as the waves went back-and-forth.

Despite the clouds preventing the sun from fully appearing, student outdoor leaders Violet Delgado and Anna Plover still felt like the event was a success and were grateful to share with students the surrounding CSUMB area.

"It's a really great thing to get students out to the beach because it's only a mile and a half walk. We want to encourage people and bring them out if they are not comfortable going on their own. It's just a really great opportunity to have the beach and a place to hike right next to the school," said Delgado.

"Hiking is a good way to just destress and decompress at the end of the week along with being a good way to exercise. It's a great way to get students to experience the beach and watch the sunset and build a community overall," said Plover.

What was the most exciting thing you did over winter break?

Otter Chatter By Andrea Valadez

Karla Vazquez

Psychology
Third-Year

"Over the holidays [my family and I] bonded together and I brought one of my international friends from Japan home with me. She had never tried Mexican food or knew about Mexican traditions... we gave her candy, tripe pozole and tacos... she loved it."

Lollie Harvey

Humanities and Communication
Third-Year

"The most exciting thing I did over break was just prepare to transfer here, I'm not even gonna lie. It was a little bit stressful being a transfer student and coming in the middle of the year, but also exciting to get everything together."

Elina Boss

Humanities and Communication
Third-Year

"I volunteered at the aquarium lot... after the holidays, I'd see maybe 50 people there which gave me a lot of opportunities to really look at all the aquariums and creatures. The king tide brought in a lot of animals right into our cove, so we saw otters and seals every single day. I'm a humanities and communications major but this is like a passion project of mine."

Congressional hearing seeks solution for Ticketmaster monopoly

Story by Max Guerrero and Andrea Valadez

Screenshot by Max Guerrero

Photo courtesy of Ginny via flickr

Ticketmaster was issued a warning by the Senate on its hold over the ticketing industry during a hearing on Tuesday, Jan. 24. The hearing came after fan outrage following Taylor Swift's The Eras tour ticket presale. The company, which was acquired by Live Nation in 2010, blamed bot activity for low ticket supply and extremely high fees.

The bipartisan Senate Judiciary Committee led by Senators Amy Klobuchar and Mike Lee focused on Ticketmaster and Live Nation's ownership of major venues that dominate the market. The hearing is meant to strengthen antitrust laws, and better the live concert experience, making shows accessible for all fans.

In order to regain fans' trust, Ticketmaster must provide "full transparency for consumers on convenience fees and why the fees are added on top of each other," said fifth-year Mia Lepe, the vice president of California State University Monterey Bay's (CSUMB) newly founded Swifties club.

Live Nation dominates 70% of the concert market. Live Nation CFO Joe Bechtold claimed during the hearing they control a minority of venues in the market. However, the 400 venues they do own or have restrictive contracts with receive a majority of the demand, contributing to the monopolization of the industry.

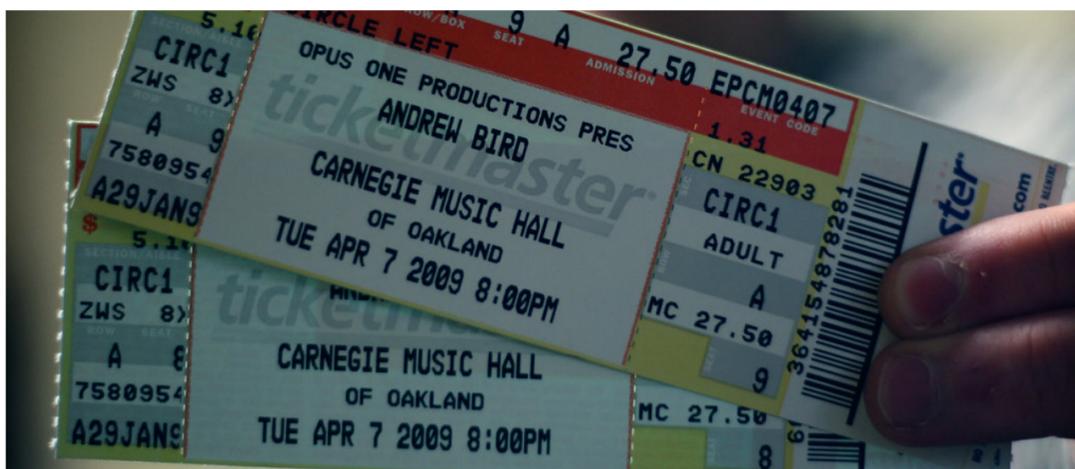

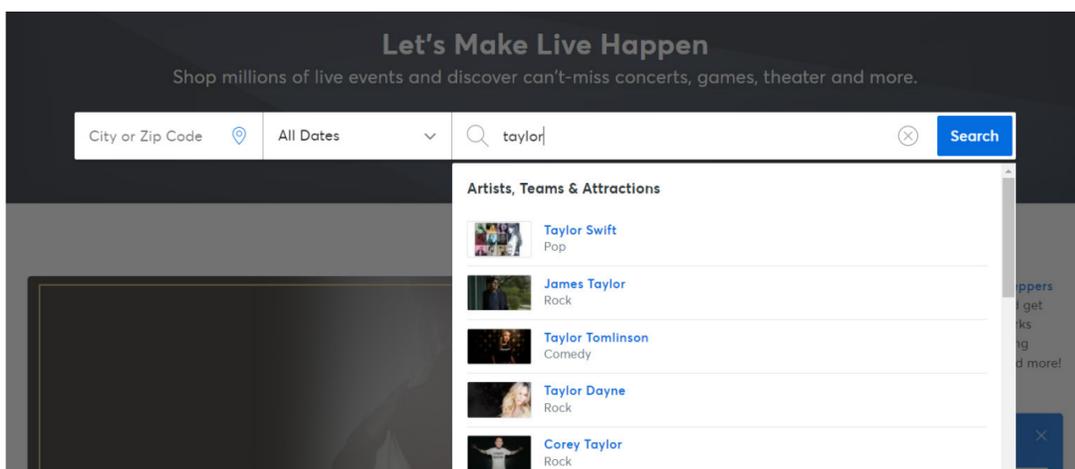

He blamed the "terrible consumer experience" during the Eras Tour presale on bot attacks and is pushing for Congress to expand the BOTS Act, the 2016 bill that prohibits scalpers from purchasing tickets in large quantities. While this may make it somewhat easier for fans to secure tickets, cracking down on resellers won't solve the monopolization of the market.

Lepe believes that "the government needs to step in and break down the monopoly... Ticketmaster doesn't care about us at the end of the day and I doubt that they're gonna break it up themselves."

Klobuchar said Ticketmaster locks the venues that they don't own into several year long contracts, making it nearly impossible for competitors to sell tickets. According to Klobuchar, "If you don't have competition, bad things can happen and prices are way too high."

Some ticketmaster fees have been up to 75% the price of the ticket although they claim to have little say in setting fees. Bechtold later revealed that "the fees are set by Live Nation venues."

When it comes to the Eras Tour fiasco specifically, "Ticketmaster knew the demand was enormous... it's to

their advantage to slow the process down and do the pick a seat option, which drives prices up... The higher the ticket price, the higher the fee," said Jerry Mickelson, co-founder of the legendary Chicago promotion agency Jam Productions.

The longer the contract, the greater the risk of a competitive advantage, making it more difficult for other ticket distributors to enter the market according to SeatGeek CEO Jack Groetzinger.

Ticketmaster's stance is that they have an "artist first business model" and work to support artists and provide them with as much success as possible. However, artists who perform at Live Nation venues have no freedom to determine who will be involved in promotions and ticket sales. This takes away artists' abilities to negotiate on behalf of their fans and fulfill creative visions.

Clyde Lawrence, the frontman for the band Lawrence, testified at the hearing that it would be great to have the option to shop around and find out if another ticketing

company would be able to offer a better deal and lower fees. Live Nation's ironclad contracts prevent artists from having the freedom to consider other options.

"There's not been a single time in our career where we've performed at a Live Nation venue where we had the option to not have Live Nation be the promoter or ticketmaster be the ticketing company," said Lawrence.

He also said venues don't set the fees, contrasting what the Ticketmaster representative said.

In regards to Swift's involvement, Lepe said that the CSUMB Swifties believe "Taylor has been very quiet, we love her... but at the end of the day she's a capitalist and I don't feel like there was initiative taken."

While Swift has expressed her frustration with the situation, she hasn't yet spoken up on the monopolization of the ticketing industry. Many fans hope that Swift will take action in the form of boycott or protest.

Women's Water Polo extinguish a Santa Clara third quarter comeback

Story and photos by Oscar Daniel Jimenez Iniguez

The California State University Monterey Bay (CSUMB) women's water polo team narrowly defeated visiting Santa Clara 11-10 on Jan. 28 in their 2023 season home opener.

The first quarter of the game proved to be in the Otters' favor as after an early Bronco goal by Kate Rodman (#8), Otter Amanda Bennett (#7) would go on to score twenty seconds later and was followed by a goal by Shea Tully (#9) and Celcile Judy (#3). Bronco Rodman scored another goal, which Monterey responded shortly after with a goal scored by Hailey Alexander (#5).

Santa Clara scored their last goal of the quarter just before Monterey finished with back-to-back goals. The Otters scored three goals in the second following quarter with Santa Clara only scoring one. The second half ended with the Otters leading 9-4.

The following quarter was a completely different story as Santa Clara went on a four-goal streak and defensively held Monterey to a scoreless quarter cutting the lead to 9-8. In the final quarter of the game, both teams scored two goals each with Monterey withstanding Santa Clara's near comeback that ultimately fell short.

The Otters improved to 2-3 overall, while the Broncos fell to 0-1.

Their next game will be on Feb. 4 against Azusa Pacific University. For more information on upcoming games, visit otterathletics.com.

See all game scores on page 8.

KeyWe is the cutest co-op

8-Bit

Story and screenshots by Arianna Nalbach
Illustration by Malia Savella

Take on the role of the most adorable postal worker in Stonewheat & Sons' "KeyWe," — a co-operative puzzle game that was released in August 2021 but recently gained traction on social media.

In "KeyWe," you and a friend can play as Jeff and Debra, two kiwi birds working in a whimsical post office employed by various animals, from cassowary mail carriers to an octopus sorting letters.

After a few tutorial levels, where you will be introduced to the core mechanics of "KeyWe," you will encounter progressively more complex puzzles and challenges as you progress through the game.

As a small kiwi bird, you must become a creative problem-solver and use a mix of jumping, pecking, and butt-slammings to get the job done and get messages out on time.

Through three vigorous months, you must face "perilous postal environments and navigate seasonal hazards while waddling through the Telepost's various mail rooms," according to the game's description on Steam.

Once the core mechanics of "KeyWe" have been established and players have the opportunity to get familiar with the Telepost's routines, the game will build upon these as each day goes on.

While the basic concepts remain the same, each level introduces a new twist, whether it be a new mechanic to be used moving forward or just something fun to diversify the level.

With each level bringing a new twist, it is easy to get sucked into "KeyWe" and want to play for hours without getting bored. Whether it's the weather, a challenge brought on by one of the other animals or something to get in the holiday spirit, each level will always have some slight twist.

If players want a break from the main levels, they can take on extra shifts that sometimes come with bonus pay, which differs from their usual postal duties. Each new season will introduce three new bonus jobs as you progress through the calendar.

These minigames are a fun change of pace from the story campaign and a great way to earn extra stamps, the in-game currency.

What do you use these stamps for? "KeyWe" offers a surprising amount of character customization. Using stamps, you can buy various hats, backpacks, hairstyles and more to ensure your kiwi is always the best dressed, no matter the occasion.

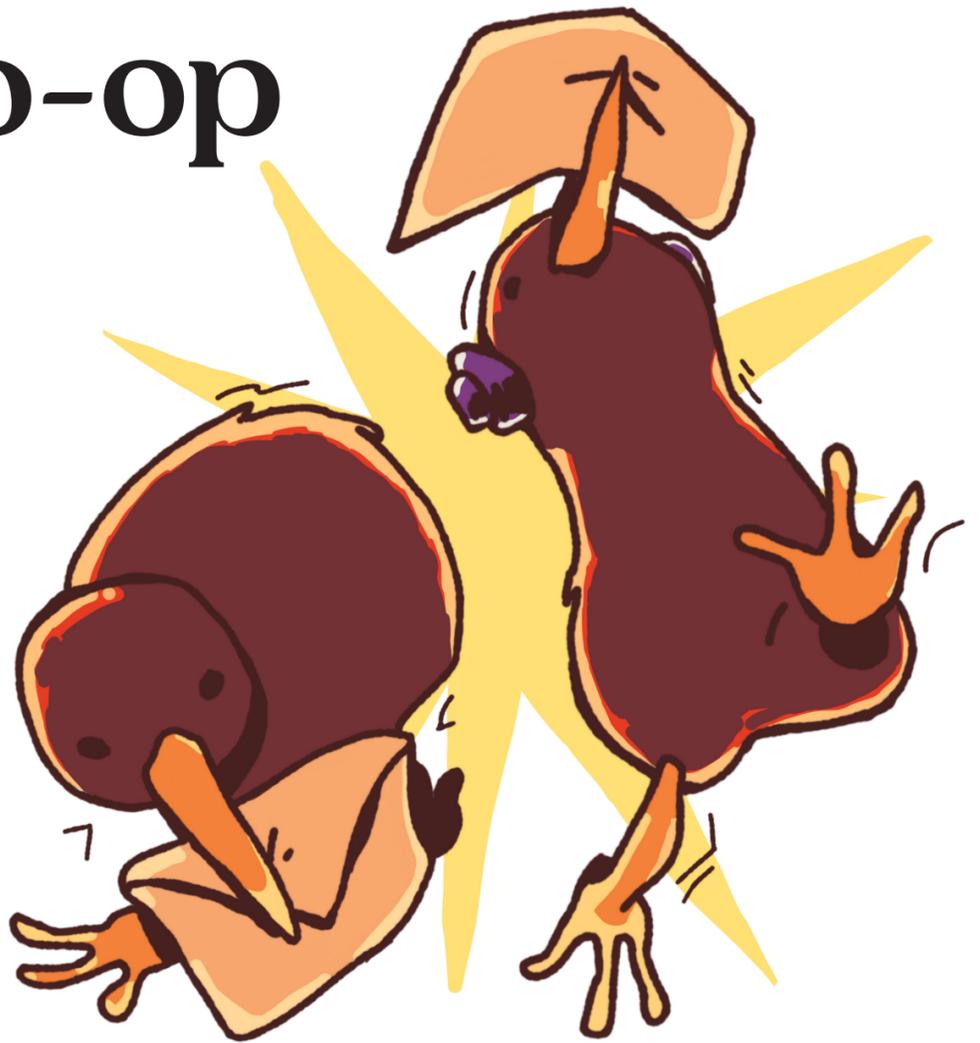

Between cute character customization options and plenty of fun levels to play, there is no shortage of things to do in "KeyWe."

Even after you complete the story campaign, you can still replay levels to try and earn a gold medal by completing them in a fast enough time, working on finding collectibles hidden throughout the game or trying to earn all of the achievements.

While "KeyWe" is fun, it isn't without flaws and occasionally has a few bugs and lags sometimes while playing online on PC. However, the pros outweigh the cons and are still worth trying out.

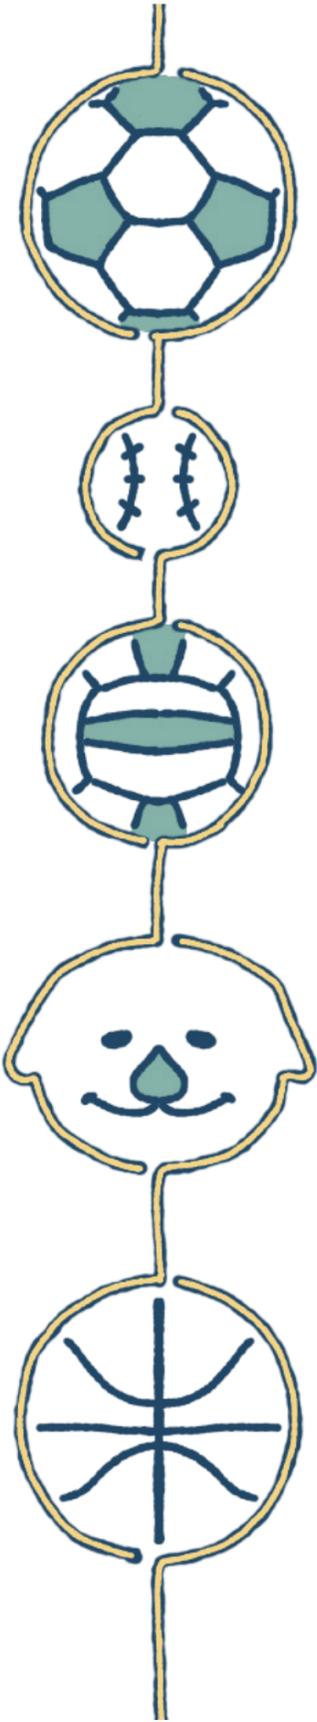

Overall, "KeyWe" has a lot to offer and can be a beginner-friendly game for those who are more interested in playing casually or more challenging for someone interested in trying to get gold on every level.

"KeyWe" is available on Xbox, PlayStation, Nintendo Switch, PC, and Mac computers and can be purchased for \$24.99 for anyone interested in beginning the cutest postal worker adventure.
